JAQUAR. A GROUP ON A MISSION.

JAQUAR BRANDS

Jaquar Group caters to all market segments- luxury, premium, and value- across residential and commercial sectors globally, through its three leading brands:

Artize

- Celebrates exquisite craftsmanship and design mastery
- Caters to luxury segment
- Crafted for luxurious bath spaces with perfect harmony
- So refined, it inspires the aesthetics of entire living spaces

---

Jaquar
BATH + LIGHT

- A global superbrand known for innovation, technology, and design
- Caters to premium segment
- Offers ergonomic, stylish, and durable bath and lighting solutions
- Trusted worldwide for high performance and aesthetics

ESSCO

- India's benchmark value-for-money bath brand for over 60 years
- Caters to value segment
- Pioneer of organised bath fittings in India
- Focuses on quality, hygiene, affordability, and 10-year warranty

JAQUAR GROUP | KEY FIGURES

55+
countries across Europe, Middle East, Asia and Africa

Over 45.9
million bath fittings produced annuallv

zero
waste plant 5,00,000 litres of water recycled every day

13.5
mw of solar energy generated

Over 3.3
million bathrooms delivered every year

4,221
metric tonnes of brass recycled every year

8
state-of-the-art manufacturing facilities spread over 3,30,000 sq.m.

MANUFACTURING THE FUTURE OF LIGHTS

- Sprawls over 7.27L sq-ft. of covered area
- Fully automated facility for ROHS compliant LED drivers and a wide range of LED Lighting products under one roof (LED Bulbs, Battens, Panels, Chandelier, Decorative Light, Recessed lights, Streetlights, Floodlights, Smart lights, Highbay lights)
- SMT Capacity to mount 160000 LEDs per hour
- Capacity to mount 120000 electronic component per hour
- Powder coating machine – capacity to make 22000 housing per day
- Aluminium pressure die casting machine (Capacity :250 tons & of 350 tons)
- NABL accredited Lab and in-house testing facility

Give your spaces a strong profile

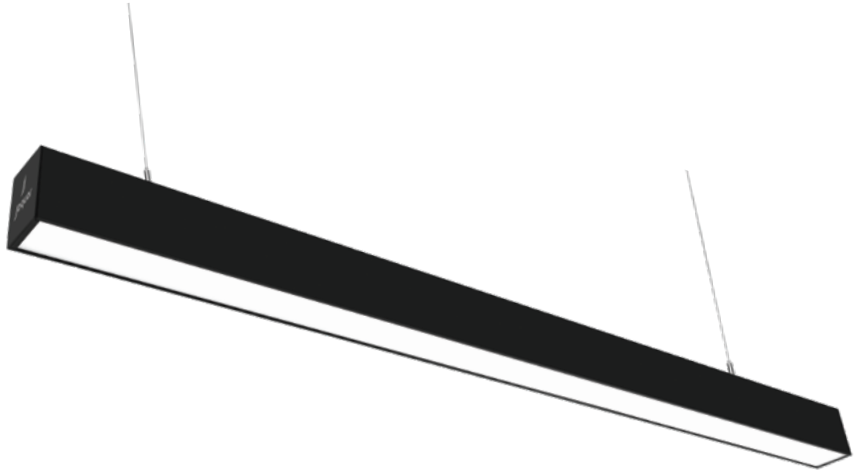

A masterful technique that transforms interiors into breathtaking works of art is the magic of profile lighting.

Designers can craft a soft, ambient glow that caresses every curve and contour by embedding LED strips within sleek aluminium channels, often hidden within the fabric of ceilings or walls. The effect is mesmerizing: textures come alive, shapes are accentuated, and the space itself seems to breathe with a newfound depth and dimension.

Profile lighting offers endless possibilities for creative expression. It allows architects and interior designers to orchestrate the intensity, colour, and direction of light with precision, tailoring the ambiance to evoke emotions and inspire wonder.

STRETCH CEILING

STRETCH CEILING: PRODUCT BIFURCATION

COMPONENTS OF
STRETCH
CEILING

DRIVER WILL BE INSTALLED WITHIN THE CEILING

PROJECT REFERENCE

Product Category:

Ceiling	
Watt(±5%)	7-10W Per Sq. Ft.
Beam Angle	110°
CRI	>80
CCT	3000K/ 4000K/ 6000K
Lumen/ Watt (±5%)	45/ 50/ 55
Warranty	2 Years

STRETCH CEILING: FAQs

Q1. What are the dimensions of the Stretch Ceiling Wooden Box?

- Outer Size: As per requirement
- Inner Size: As per design
- Minimum Box Thickness: 50 mm
- Minimum Box Depth: 150 mm (from inside)
- Ceiling Height: As per site

Q2. What key factors should be considered before planning a Stretch Ceiling installation?

- Site Location
- Driver Option: ON/OFF or DALI
- Area in Sq. Ft.
- Shape & Drawing: Fabric can be Printed/Non-Printed
- Size in Sq. Ft.
- CCT (Colour Correlated Temperature)
- Wattage Preference (Standard 10W per sqft)
- Box Level from Ceiling & Floor (to be finalised with Architect/ Interior Designer)

Q3. What material is recommended for the inside surface of the box?

- White laminate should be used inside the box.

Q4. How should the Stretch Ceiling Box be attached to the ceiling?

- Use a **threaded rod (8mm)** with a **Hilti fastener**, **aluminium support**, or **wooden support frame** to fix the box to the ceiling.

STRETCH CEILING: FAQs

Q5. What is the finish of the outer box?

- The outer finish of the box should be finalised as per the **architect/interior consultant's approval**.

Q6. Where should the LED driver be placed?

- The LED driver should be kept **outside the box**.
- A **trap door** near the stretch ceiling or an **accessible ceiling opening** (through an LED downlight or gadgets) is required for maintenance.

Q7. What type of electrical connection is required?

- Provide an electrical input connection with a **double-pole MCB**.

Q8. Is scaffolding required during installation?

- Yes, scaffolding is required.

Q9. What is included in the fixture supply?

- For a **4ft x 4ft size**: A complete fixture is provided.
- For **other sizes**: Only **LED, PCB, driver, fabric and installation** are provided.
  - The **wooden box will be provided by the contractor**.
